

Porsche Microlon Test

A test of the effects of Microlon was conducted on a Porsche 928 for Porsche AG by the VW emission Lab in Woodland Hills, California. The following results were obtained:

Before	After	Change
10,608 Miles	11,705 miles	1097 miles
HC .481 PPM	.287 PPM	reduced 40.3%
CO 2.66%	1.11%	reduced 62.6%
NOX 1.02 PPM	0.82 PPM	reduced 20.0%
Mileage 13.3 MPG	14.6 MPG	Increased 9.8%

The Porsche people felt that the improvements shown were significant. Other data not related to the Microlon results on this test is privileged information. Copies of the actual results will not be made available. If verification of this data is necessary, it can be obtained from Porsche AG in Culver City, California.
